- The bottom shell, surface frame and the transparent cover are made of new PC material, which has good toughness, high strength, good impact resistance, and long service life.
- The product is waterproof, dust-proof, anti-corrosion, making it suitable for various indoor and outdoor places.

Advanced Features

IP65 Protection Level

1. The surface cover and bottom shell are wrapped with waterproof sealing strips, providing better waterproof performance
2. Fix screws in the waterproof strip to improve its waterproof performance

Reserved space for functional sticker

There is a space on the surface frame especially for functional stickers. After that, you can clearly view the component control area.

Latch function

Reserved for anti-theft lock

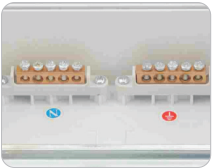

Circuit baffle structure

The circuit baffles on the left and right sides of the surface frame have a partial filling function and are easy to disassemble

Captive frame structure

Using captive screws and making sure the screws will not be lost when loosening the surface frame

Copper terminal assembly

The terminal block can pass the 960°C glow wire test, its safety performance is guaranteed
